

Curriculum vitae

Family name: Drs. Nino van den Bergh / Mchedlishvili

Birth date: 1 november 1967

Born: Tbilisi, Georgië

Nationality: Georgian

Email: arabuli2003@hotmail.com

General middle school (1972).

1st class of 1 September 1972 in Gurdjaani.

Gurdjaani is a city in the east of Georgia.

My father worked in this city as doctor/kurortology in the Athala sanatorium.

School N31, Tbilisi (1973-1981)

Special experimental English language school N29 "Korneli Kekelidze", Tbilisi (1981-1983)

I graduated on this school in 1983

In Georgia people have a school duty of 11 years.

Olympiads:

On school I took part on several school Olympiads.

I was very interested in the subjects of: biology, fysiologie, chemistry.

Journalistics:

During these Olympiads I got my second degree diploma as young writer

I am member of the international journalistic federation and also got a press card.

Working stage to enter university: (1983-1986)

In this era it was a obligation to first work in the public sector before you can enter the university.

After my school I worked two months as general worker on the same clinic where my father worked.

After that I moved in 1983 on the age of 16 years to the capital city of Kazahstan, Almaaty. There I worked for 1 year as general worker.

In 1984 I got the opportunity to work at the secretary of the polyclinic in Semipalatinsk.

University Semipalatinsk: (1986-1992)

In 1986 I did the zero course, this was needed to enter the medical university of Semipalatinsk.

This zero course was a evening of one year.

During day I worked as nurse at the dentistry.

One year later in 1987 I started the day education in the medical university faculty of general medicine.

University Tbilisi: (1992-1994).

Because the situation for foreigners in Kazahstan/Semipalatinsk changed and also because a civil war started in Georgia I was forced to return home.

In 1994 I graduated as generalist doctor on the medical university of Tbilisi.

Stage/work in a balneological resort in Tbilisi (1994)

During two months I had stage in the gynecology consulting room.

In here I did much treatment of women with infertility and several gynecological diseases.

Education for gynaecology/obstetrician in Tbilisi (1995)

Shortly after I got my general doctor diploma again a civil war did break out in Georgia.

Because of this the Ministry of Health permit me to do a shortened intensive education for gynaecology/obstetrician.

This education I did at the Chachava maternity hospital in Tbilisi.

Here is a shortened list of the things I learned there:

- Practic in antepartum, postpartum and pathological observation
- Independent working as obstetrician.
- Assisting with caesarian sections and other operations
- Independently doing of abortions
- Treatment of several woman diseases like: erozium, vaginitis, colpitis, endometritis, salphingoophoritis, pelvioperitonitis and others
- Independently managing receiving labour.

Work at the Vejini sanatorium. (may 1994-2000)

After my education I started working as gynecologist at the Vejini sanatorium.

My job in this sanatorium was the following:

Pathological research for treatment of infertility of women.

Complex hormone treatment.

Several gynecological treatment against woman infertility.

This sanatorium uses physiotherapy and complex hormone treatment and special mud treatment.

This mud is rich on minerals and chemical elements.

The average result of this sanatorium from fertilisation to birth is 60 to 65 percent.

Languages:

I can speak and speak and write the following languages:

Georgia	fluently
English	fluently
Turkish	fluently
Russian	fluently
Latin (medical)	
Dutch.	average

Hobby's:

Correspondent (journalistic), politics.
